## GENERATORS

### FEATURES:

- 25kw
- 45kw
- 70kw
- 100kw

Powered by a rugged, fuel-efficient Isuzu engine. Meets current EPA emission standards. Exceptionally quiet thanks to advanced sound-absorbing technology. Lightweight and compact.

### Cobalt's Generators

Our fleet of generators from 2kw portables to 100kw towables are high quality power sources for telecom sites, lighting facilities, power tools, submersible pumps

and other industrial and construction machinery; allows Cobalt to provide power for special events, construction jobsites, military training, and support for entire base camps in emergency situations.

Our quality generators are regularly tested and serviced by certified technicians to ensure our equipment is reliable and safe. Cobalt generators stand ready for emergency incidents for Cal Fire, US Forestry, and other government agencies and businesses for situations where power sources are limited or unavailable.
