

Rental options include daily, weekly and long-term, with HVAC units

TENTS/SHELTERS

Cobalt's Western Shelters

- The Western Shelter system was designed to provide an easily transported, simple to erect, and, most importantly, weather-secure working environment for operations in remote locations.
- From the arctic to the tropics, the proven reliability of the shelter design, material and construction has consistently exceeded customer expectations in the harshest of conditions.

WESTERN SHELTER TENTS:

- With more rigid-frame portable shelters deployed with disaster response teams than any other such shelters in the world, Western Shelters Vestibule System means that your shelter can now be immediately integrated with arriving emergency response teams to form an ever-expanding Base of Operations.

E-Z UPS & CANOPY TENTS:

- Canopy frames are made from aluminum tubing and welded steel fittings. Provided with or without sidewalls.
- Sizes from 10x10, 10x20, 10x30, 20x20, 30x30, 40x desired length with customized 10' sections.
